Feature Publication

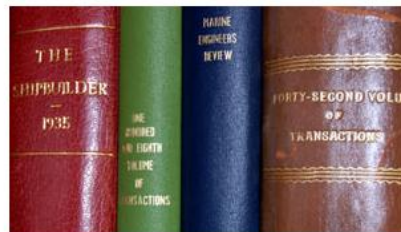

Transactions »

Volume: 16 Year: 1904

The 16th volume of Transactions of the Institute of Marine Engineers includes all technical papers presented in 1904, the year in which Charles Parsons (pictured) took the annual appointment of the Institute President.

Amongst other developments in marine engineering, the volume contains Parsons' Presidential Address in which he describes the past, present and future, as he saw it then, of the marine engine.

The header of the IMarEST website features a blue and red background with a coral reef and yellow fish. On the left is the logo for the Institute of Marine Engineering, Science & Technology. On the right is a search bar with the text "Search the IMarEST online archive" and a magnifying glass icon. Below the search bar are radio buttons for "All", "Title", "Author", and "Year", and a dropdown menu for "All series". A navigation bar at the bottom contains links for "Home", "About the archive", "Author index", "Title index", "Series index", "Help", and "Log out".

Volume: 16 Year: 1904

The 16th volume of Transactions of the Institute of Marine Engineers includes all technical papers presented in 1904, the year in which Charles Parsons (pictured) took the annual appointment of the Institute President.

Amongst other developments in marine engineering, the volume contains Parsons' Presidential Address in which he describes the past, present and future, as he saw it then, of the marine engine.

At the time the Transactions were edited by Jas. Adamson, the then Honorary Secretary of the Institute and recorded as Member No. 1 at the founding of the Institute of Marine Engineers in 1889.

In addition to papers read that year, the volume also contains the Annual Report, Financial Statement, Additions to the Library and a List of Members totalling just 928 individuals.

Transactions

Volumes: 48/Articles: 915

Description:

The recorded history of the activity of the Institute including member lists, obituaries, annual reports and technical papers with documented discussion and author reply.

The technical papers published in the Transactions cover historical technical advances and significant contributions from individual engineers throughout the history of marine engineering.

This collection spans the vast history of the Institute being published from the year of our founding in 1889 through to the turn of the new millenium in 2001.
