

PROGRAMME OVERVIEW

With over 50 technical papers received from 40 organisations across 17 countries, ICMET Oman 2019 looks set to be a truly outstanding showcase for the cutting edge of marine engineering and technology. The conference will include a selection of eminent keynote speakers and a rigorous academic programme, including sessions around ship design and propulsion, marine professional development, safe automation and remote manning, naval engineering, support and infrastructure, marine resources and security and sustainability and green shipping.
