

10th July 2019

To whomsoever it may concern

I am pleased to recommend the Institute of Marine Engineering, Science & Technology (IMarEST) UAE branch as a premier organization that facilitates continuous professional development within the regional maritime sector.

On 27th June 2019, Elcome sponsored a technical meeting with focus on the topics of Digital Navigation, Connectivity and Cyber security. The technical meeting was a greatly accepted by the UAE maritime and shipping industry professionals because of the competent management of the whole program by the IMarEST, UAE Branch. The UAE Branch of IMarEST with great comprehensive knowledge on the marine engineering and navigation, combined with excellent leadership and a warm personal approach to the maritime fraternity dramatically improved the success of our Technical Meeting. IMarEST UAE Branch found a suitable venue, invited the industry members with an appropriate invitation and conducted the Technical Meeting with high professional standards. The Technical Meeting was attended by 150 professionals from the Middle East and the Indian Subcontinent.

Despite the busy schedules, the IMarEST volunteers are committed to imparting knowledge on contemporary technology with the regional marine industry stakeholders, which benefits professionals, organizations and the whole maritime industry with opportunities to adopt and exercise best practices for operational efficiency.

Sincerely,

Jimmy Grewal
Executive Director

Elcome International L.L.C.
