Electric Hybrid Propulsion

Presented by Lindsay Butler – Principle Specialist with Lloyds Register
All members, guests and visitors welcome - this lecture qualifies for CPD
A complementary buffet will be provided post lecture for attendees

Lindsay Butler will provide a summary of the main principles of battery and hybrid propulsion in the marine industry and discuss the advantages and potential hazards of this technology. The lecture will also cover how this technology will be implemented in the coming years and Lloyds Register's approach to appraising such designs.
